ROME (PIN ZHI) YE

AI Product | Computer Vision Go-to-Market | Agentic AI Workflows | Retail Frontline Operations

Taipei, Taiwan | Taiwan Citizen | +886 981 257 732 | srs0319@gmail.com | Portfolio: rome-portfolio.n239.xyz

SUMMARY

I turn cutting-edge technology into value narratives and take AI products from 0 to 1 into the market. 13 years across technology marketing, sales enablement and frontline retail leadership, including 8+ years at HTC and the industrial AI company DaoAI. At DaoAI I was the sole marketing function for a computer-vision inspection system, translating model capability into what customers weigh (yield, false calls, deployment cost) and working daily with engineering through review gates. I designed and run a human-in-the-loop AI agent workflow inside a company, and independently built and shipped two AI iPhone apps, defining users, value proposition, pricing tiers and quality rules myself. Earlier I ran retail stores in Australia, so I know how a frontline team actually reacts to a new alert, tool or process on the shop floor.

CORE CAPABILITIES

Product Discovery & Problem Framing | Trade-off Decisions (speed vs. quality, custom vs. productized) | Computer Vision Value Translation | Human-in-the-Loop & Agentic AI Workflows | RAG, LLM Evaluation & MCP | Success Metrics & Feedback Loops | B2B Customer Journey & Enterprise Inbound | Retail Store Operations & Frontline Training | Cross-Functional Alignment with Engineering

PROFESSIONAL EXPERIENCE

DaoAI | AI Technical Marketing Lead

Vancouver, Canada (Hybrid) | 01/2025 – 07/2026

Industrial AI company delivering computer-vision automated optical inspection systems for PCBA manufacturing. Sole marketing function, owning both strategy and hands-on delivery.

- Translated computer-vision and deep-learning inspection capability into the decision criteria factory buyers use (yield, false calls, deployment cost), and brought customer and factory-floor feedback back into product positioning as product-market-fit input.
- Set engineering-review gates so every customer-facing claim was technically accurate; worked with engineering on what the system could and could not promise.
- Designed and ran a human-in-the-loop LinkedIn AI agent built with Claude Code (AI drafts, a human reviews, then it publishes), and replaced HubSpot with a self-built CRM: defined which steps AI owns, where human review is mandatory, and how to trace a bad output back.
- Built the buyer journey from search and content through trade shows to CRM follow-up: #2 on Google organic search for "AI AOI", cited by generative AI search engines, and 10+ inbound enterprise enquiries a month, including enquiries from Foxconn US, Inventec, NXP, Honeywell Aerospace and Advantech.
- Represented the company at Computex, InnoVEX, Hannover Messe and APEX EXPO; owned market research and competitive analysis across Taiwan, China and North America.

HTC | Product Marketing Manager & Business Development Manager, APAC

Taipei, Taiwan | 05/2023 – 06/2024

- Led APAC and Southeast Asia localization strategy and sales enablement, aligning headquarters, product, regional sales and distributors without direct authority; contributed to 40% QoQ regional revenue growth.
- Drove VR and metaverse go-to-market and regional partner development, including Hong Kong Cyberport and a VR esports arena in Malaysia.

T-Shine Case | Area Manager

Sydney, Australia | 03/2022 – 04/2023

- Restructured merchandising, promotions, staffing and daily store routines; grew store sales 3x within three months and lifted customer conversion to 80%. Led a team of five.

Elephone | Store Manager to Human Resources Manager

Melbourne, Australia | 06/2020 – 03/2022

- Ran recruitment across nine stores and built frontline onboarding and daily routines; a membership program lifted repeat purchase by 30%.

HTC | Trainer to Product Marketing Specialist

Taipei, Taiwan | 11/2013 – 09/2019

- Designed and delivered VR training to 300+ retail and channel staff, including on-site troubleshooting of game crashes and controller tracking issues; delivered 100+ frontline sessions in a peak year and built a seed-trainer program.
- Owned the launch narrative and deck for the HTC U12+ Taiwan press conference; reviewed official product pages for technical accuracy.

APPLIED AI & PRODUCTS BUILT

GlycoWave | **AI diet assistant (iOS)** — Built independently with vibe coding around glycemic index for people managing blood sugar; defined the user, use cases and features; live on the App Store since late September 2026.

Panny | **AI companion (iOS, panny.n239.xyz)** — Combines astrology, BaZi, tarot and mood journaling in one conversation; designed subscription tiers by number of AI replies (free / light / full); user data stays on device and is not used for model training.

IBM RAG and Agentic AI Professional Certificate | **Coursera 2026** — RAG, vector databases, LangChain, LangGraph, CrewAI, AutoGen and Model Context Protocol (MCP), with a capstone project.

EDUCATION & LANGUAGES

Providence University, Bachelor's Degree in Mass Communication (Taichung, 2007–2011)

Mandarin: Native | English: Professional Working Proficiency (CELPIP L9 / R8 / W8 / S8)
