ROME (PIN ZHI) YE

AI Product & Technical Marketing Lead | Edge Computer Vision, Agentic AI Workflows & 0-to-1 AI Products

Taipei, Taiwan | Taiwan Citizen | +886 981 257 732 | srs0319@gmail.com | Portfolio: rome-portfolio.n239.xyz

PROFESSIONAL SUMMARY

I turn cutting-edge technology into value narratives and take AI products from 0 to 1 into the market — combining technical fluency in computer vision and agentic AI, cross-functional translation across engineering and commercial teams, and hands-on product building. Brings 13 years across technology marketing, sales enablement and frontline leadership, including 8+ years at HTC and DaoAI. At DaoAI, an industrial AI company delivering computer-vision automated optical inspection systems, architected cross-functional workflows across engineering, sales and global partners across North America and Asia — setting priorities and engineering-review gates, carrying field feedback into product positioning, propelling the core keyword "AI AOI" to #2 organic rank on Google Taiwan (retained as of Oct 2026), and generating 10+ organic enterprise enquiries per month. Builds with AI, not only about it: independently built a custom CRM (replacing HubSpot) and a human-in-the-loop AI agent with Claude Code to automate team workflows, shipped 0-to-1 AI iPhone applications (GlycoWave, live on the App Store, and Panny) from problem discovery and UX to tiered subscription models, and holds the 10-course IBM RAG and Agentic AI Professional Certificate. Pairs deep tech execution with multi-store physical retail operations leadership in Australia (tripling store sales within three months and lifting conversion to 80%). Bilingual in Mandarin and English.

CORE COMPETENCIES

AI Product Direction & 0-to-1 Execution | Problem Framing, Prioritization & Trade-Off Decisions | Cross-Functional Alignment (Engineering, ML, Sales, Operations)
Edge AI & Computer Vision Commercialization | Technical Value Translation | Field Feedback Loops & Product-Market Fit Input | Metrics-Driven Iteration
Artificial Intelligence for Daily Work | Generative and Agentic AI | Retrieval-Augmented Generation (RAG) | AI Agent Development | Model Context Protocol (MCP) | CRM Build
Strategic Program and Project Delivery | Scope and Dependency Management | Milestone Planning | Engineering Review Gates | Delivery Follow-Through
Go-to-Market (GTM) Strategy | North America, APAC and Southeast Asia Rollouts | Market and Competitive Analysis | Product Positioning and Differentiation
Physical Retail Store Operations & Frontline Enablement | Store Workflow Optimization | Customer Conversion & Frontline Execution | Seed-Trainer Programs

PROFESSIONAL EXPERIENCE

DaoAI | AI Technical Marketing Lead

Vancouver, Canada (Hybrid) | 01/2025 - 07/2026

Industrial AI company delivering computer-vision automated optical inspection systems for PCBA manufacturing. Sole marketing function, owning both strategy and hands-on delivery.

- Architected the cross-functional workflow across product positioning, technical content, website, industry events, CRM and commercial follow-up — mapping dependencies, setting priorities and engineering-review gates, and aligning leadership, engineering, ML/vision teams and sales to move work from ambiguous requests to delivered outcomes.
- Translated complex 3D computer-vision and deep-learning inspection capabilities (edge inference speed, false-call trade-offs, deployment constraints) into crisp value narratives and decision criteria for enterprise buyers, distributors and system integrators across North America, Taiwan and China.
- Carried customer and factory-floor deployment feedback back into product positioning and cross-functional prioritization as continuous product-market fit input.
- Independently built a custom CRM system (replacing HubSpot) and a human-in-the-loop LinkedIn AI agent using Claude Code, defining review and publishing gates and introducing agentic AI workflows into daily team operations.
- Architected category-defining content and SEO/GEO structured data: propelled the high-intent keyword "AI AOI" to #2 organic rank on Google Taiwan (retained as of Oct 2026), earned direct citation in Generative AI engines, and generated 10+ organic inbound enterprise enquiries per month.
- Planned external commercial touchpoints around Computex, InnoVEX, Hannover Messe and APEX EXPO, represented the company on site, and converted enterprise conversations (including inquiries from US Foxconn, Dell, Inventec, NXP, Honeywell Aerospace and Advantech) into structured follow-up pipelines.

PROFESSIONAL EXPERIENCE (CONTINUED)

HTC | Product Marketing Manager & Business Development Manager, APAC

Taipei, Taiwan | 05/2023 - 06/2024

- Led APAC and Southeast Asia localization strategy and sales enablement material development across hardware and XR ecosystems, contributing to 40% QoQ regional revenue growth.
- Coordinated across headquarters product management, engineering, regional sales heads and tier-1 distributors to align global product roadmaps and messaging with local market requirements and commercial priorities.
- Drove VR and metaverse go-to-market across APAC, developing a regional partner ecosystem including Hong Kong Cyberport and a VR esports arena partnership in Malaysia; discussions reached a substantive stage prior to departure.
- Supported regional sales teams end to end across enablement materials, technical product questions and customer meetings, engaging telecom carriers, distributors, dealers and government agencies.

T-Shine Case | Area Manager

Sydney, Australia | 03/2022 - 04/2023

- Led physical retail store operations and a 5-person frontline team; tripled store sales within three months and lifted customer transaction conversion rate to 80% after restructuring merchandising, checkout/store routines, promotions and staffing.
- Increased Google Maps click-through rate by 100% through local search and content optimization.

Elephone | Store Manager to Human Resources Manager

Melbourne, Australia | 06/2020 - 03/2022

- Managed daily physical store operations (leading a 3-person store team) and scaled end-to-end recruitment across nine retail locations, hiring 12 sales associates, 4 senior technicians, a designer and an overseas e-commerce specialist.
- Built a store membership program that lifted repeat purchase rate by 30%; ranked 3rd of nine stores company-wide for Black Friday 2021.

HTC | Trainer to Product Marketing Specialist

Taipei, Taiwan | 11/2013 - 09/2019

- Designed and delivered VR product training to 300+ retail and channel staff, going beyond product features into on-site technical support — device setup and troubleshooting of consumer-experience faults such as game crashes and controller tracking failures — so non-engineering frontline teams could resolve issues without escalation.
- Delivered 100+ frontline product training sessions in a peak year and established a seed-trainer program to scale product knowledge across the retail and carrier channel.
- Built sales guides and ran competitive analysis and smartphone market research for the sales organization, and reviewed official product web pages for technical accuracy.
- Localized product education and training content across nearly every product launched in that period; owned the launch narrative and presentation deck for the HTC U12+ Taiwan press conference and presented products directly to CEO-level executives at telecom carrier clients.

CAM193 | Event Planner

Taipei, Taiwan | 10/2012 - 11/2013

- Ran corporate and public-sector events end to end, from planning through on-site execution to project closeout, including the Taoyuan Military Dependents Village Culture Festival — a government tender — and an eel exhibition at the Lanyang Museum.

APPLIED AI PRODUCTS & CERTIFICATIONS

0-to-1 AI iPhone Applications (Independent Product Creator, 2026)

- **GlycoWave (Live on the App Store, Sep 2026):** Independently defined product scope, user journey, camera food-logging workflow, post-meal energy trend tracking and subscription model for a glycemic-index dietary reference iOS app.
- **Panny (panny.n239.xyz):** Designed and built a bilingual AI companion iOS app and web platform integrating Western natal charts, BaZi, in-chat Rider-Waite tarot draws, emotion tracking, on-device speech-to-text, iCloud end-to-end encryption and tiered usage-based subscriptions.

IBM RAG and Agentic AI Professional Certificate — Coursera, 2026. Ten-course program covering RAG, vector databases (Chroma DB, FAISS), multimodal generative AI, AI agents with LangChain, LangGraph, CrewAI and AutoGen, and the Model Context Protocol (MCP).

EDUCATION & LANGUAGES

Providence University — Bachelor's Degree, Mass Communication | Taichung, Taiwan | 09/2007 - 06/2011
Languages: Mandarin (Native) | English (Professional Working Proficiency; CELPIP L9 / R8 / W8 / S8)
